

Sales Engineer Home Task

The purpose of this home task is to learn more about your technical skills. Please take up to 5 days to complete this and send it back to us.

Here are the instructions:

1. Build a one-pager website with only HTML, CSS and JS (See the attached website mockup and assets that you will need to use)
2. You can use any fonts you'd like (the mockups font is poppins if you want it to look the same)
3. The website doesn't need to be responsive
4. For the icons, you can either use the provided images or an icon library (e.g fontawesome) you don't have to use the exact icons
6. No need for Pixel Perfect but it should be fairly similar to the mockups

After completing the assignment, compress the files into a single zip file and send it back to us at joshza@accessibe.com

If you feel like you need any additional questions answered in order to prepare and you want to consult with us, then don't hesitate to reach out to me.

Good luck,
